SOUND WITH STYLE

High-performance sound and Yamaha original tech converge in the comfortable, all-new TW-E5B true wireless earbuds.

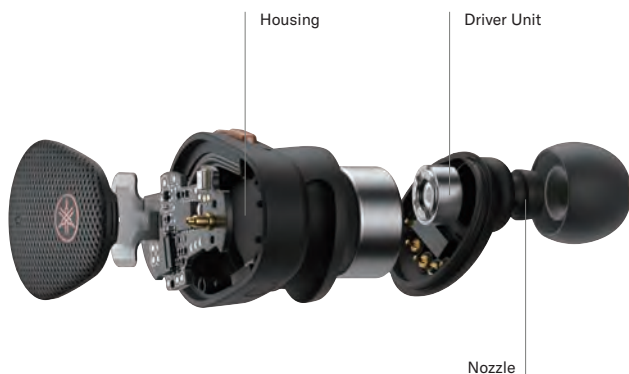

TRUE SOUND

From a studio session with your favorite artist to the best seat at a live concert, hear every detail with lifelike realism. These extraordinary earbuds combine Yamaha acoustic and electric technologies, enabling them to defy the sonic limitations of their compact housings.

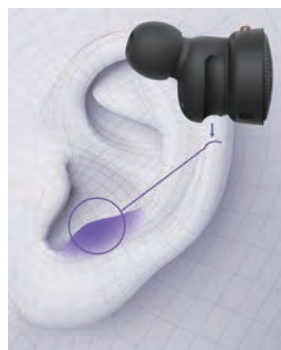

DESIGNED TO AMAZE

Hear legendary Yamaha audio engineering come to life. The driver, nozzle, airflow and acoustic space in the earbud housing are precision-optimized to deliver remarkably dynamic, well-balanced and spacious sound.

SUPERIOR FIT, SUPERIOR SOUND

Great sound and comfort both start with the right fit. The Yamaha original curved structure ergonomically conforms to your ear, ensuring a proper seal for optimal sound and a secure hold for peace of mind.

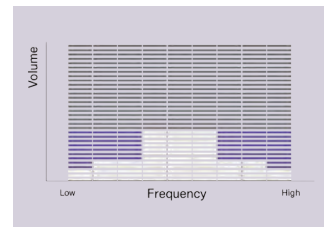

LISTENING CARE

LOVE MUSIC, FOR A LIFETIME

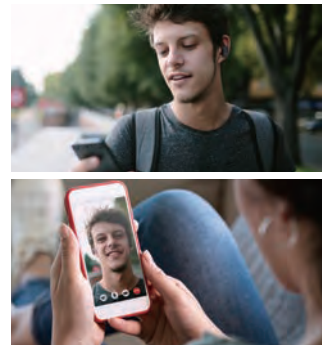

Lowering volume typically results in a perceived loss of certain frequencies, a phenomenon of human hearing. Listening Care intelligently adjusts the EQ to provide full-range sound even at a lower volume.

FEATURES

CLEARLY BETTER VOICE CALLS

Let your voice be heard. A uniquely designed mic conduit works in combination with Qualcomm® cVc™ (Clear Voice Capture) technology to provide exceptional noise suppression and echo cancelling for crystal-clear voice quality when making calls.

AMBIENT SOUND

Stay aware of your surroundings, even while listening to music.*3

GAMING MODE

Reduce the lag between sound and video when watching videos or playing games.*4

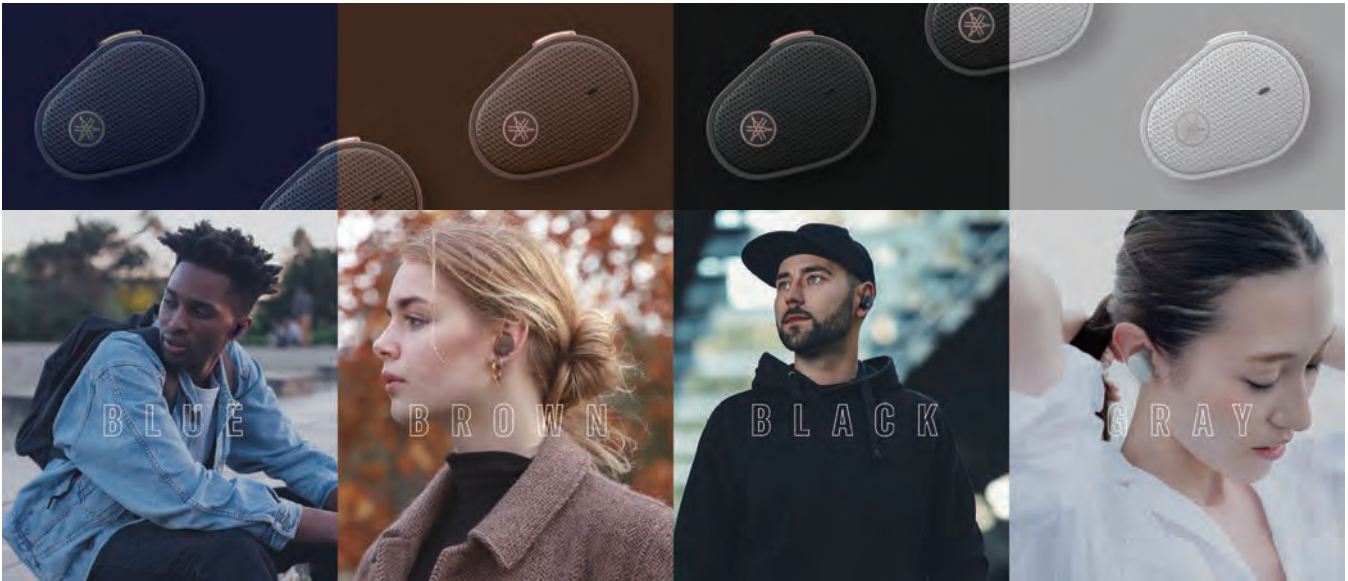

STAY CONNECTED

Qualcomm® TrueWireless™ Mirroring provides a stable, low-delay Bluetooth® wireless connection from virtually any source, while also saving power.

*1: Playback time with fully charged earbuds. *2: Total playback time after three charges in a fully charged charging case. *3: Ability to hear external sounds can vary depending on surrounding conditions and the volume of audio content played while in this mode. *4: The amount of video and audio delay varies depending on the usage environment and wearing conditions.
